

Are you ready?

Microbiome-n-Demand™

Expert guidance for your study design.

Integrated solutions for cost effective execution of population-wide projects.

Validated devices enable easy self-collection of high quality samples.

Standard operating procedures minimize bias from processing, sequencing and analysis.

Superior data analysis and metadata integration increases the scientific impact of the data.

Enhanced participant experience and bioinformatics version control enables scalability.

Is my study design optimal?

Am I using my resources appropriately?

Are my samples adequate for microbiome research?

Am I introducing experimental errors?

Am I maximizing the impact of my discoveries?

Can I scale my study and compare it with my other projects?

Talk to us today about your study goals.

Global leader, trusted partner

DNA Genotek has translated their 18 years of experience in the human genomics market to deliver high quality products and services to enable microbiome discovery.

"We've made our lab efficiency about 30% better by eliminating manual steps with OMNIgene•GUT."
Researcher, Weizmann Institute of Science

"I find it very comforting to know that the [microbial] community is just like it was when it went into the stabilization buffer."
Diana Taft, Researcher at Cincinnati Children's Hospital Medical Center

Quality and regulatory compliance

CLIA Accredited

ISO 9001 / 13485

6,000+ academic and commercial customers in 100+ countries

~2,000 peer-reviewed publications

DNAgenotek

Microbiome-n-Demand™

Turnkey solutions to power microbiome discovery

Pilot → Population → Practice

Delivered through DNA Genotek's

GENOFIND™
Services

Microbiome-On-Demand™

Turnkey solutions to power microbiome discovery

DNA Genotek offers a complete suite of solutions for every step of your microbiome research, from sample to answer.

Customize Microbiome-on-Demand by choosing the products and services you need to optimize your study and achieve your goals.

Your trusted partner from pilot to population
