

Oral sample collection

EASY • PAINLESS • PROVEN

Collect and stabilize RNA from saliva using a collection device authorized by FDA under an EUA for use in SARS-CoV-2 testing

ORAc collect®•RNA is an all-in-one system for the collection, stabilization and transportation of saliva samples suspected of containing SARS-CoV-2 RNA. The user-friendly design makes it ideal for self- or assisted collection from donors of any age, in a clinic or at home. ORAc collect•RNA stabilizes SARS-CoV-2 RNA at room temperature for 72 hours and is compatible with SARS-CoV-2 PCR assays.

Applicable for:

- SARS-CoV-2 RNA diagnostic assays

Specifications:

- Catalog number: ORE-100
- Sample stability: 72 hours
- Shelf life: 12 months
- Tube diameter: 15 mm
- Tube height (uncapped): 92 mm
- Capped tube height (post-collection): 103 mm
- Pre-collection kit weight: 7.05 g

Superior samples • Proven performance

This sample collection device has not been FDA cleared or approved. This sample collection device has been authorized by FDA under an EUA. This sample collection device has been authorized only to collect, stabilize, and maintain during transport, saliva specimens suspected of containing SARS-CoV-2 ribonucleic acid (RNA), not for any other viruses or pathogens. This sample collection device is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of medical devices during the COVID-19 outbreak under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.
