

Product change notification

Products affected:  **OMNIGene[®]DISCOVER**

Catalog numbers: OM-501 and OM-505

Effective date of change: January 2016

Customer action: Notify procurement office of brand name change if required.

Change description:

DNA Genotek will be changing the brand name and labelling of our OMNIGene•DISCOVER products to OMNIGene•ORAL. Note that the product catalog numbers will remain the same (OM-501 and OM-505). In addition to the brand name change, we have also incorporated the following changes to the labelling:

- 3 additional languages (Russian, Arabic and Korean) have been added to the Instructions for Use (IFU).
- The outer clamshell label has been eliminated as part of our “green initiative”, however all of the same labelling content is now on the front of the IFU which is clearly seen through the clamshell lid.

There will be no change to pricing or performance characteristics for these products. New product shipments of OM-501 and OM-505 will reflect the new brand name and IFU layout in January 2016; our website will be updated with the new brand name as well.

Please contact info@dnagenotek.com if you have any issues or concerns pertaining to this product change notification.
