Internal and Supplier Use

Adhesive	None
Bindery and shipping	<p>Print, trim, score, fold and bundle in units of 25 and place into overpack box(es).</p> <p>Any further information required of the supplier shall be indicated on the DNA Genotek Purchase Order (e.g., terms and conditions, part number and issue number, quantities for lot and quantities for QC samples, shipping destination).</p>
Procurement specification	See PD-PS-00038 for labeling acceptance criteria.
Colour preproduction proof	<p>The supplier shall provide a high resolution physical colour preproduction proof to DNA Genotek prior to initial print production and shall indicate correct folding.</p> <p>Subsequent reprints of this artwork issue number can be supplied as an electronic proof for approval to DNA Genotek prior to printing, with the expectation to match colour to previously accepted lot(s) of this printed material and any Pantone ink formulations that may be specified.</p>
Press approval	Not required, rather an expectation to match to the colour preproduction proof provided by the supplier.
Certificate of Conformance	<p>A Certificate of Conformance shall accompany QC samples for lot acceptance review by DNA Genotek's QC personnel and may indicate dieline number, artwork part and issue number, lot (or docket) number and shelf life, as applicable.</p> <p>IMPORTANT: The material used for the printed instructions in any given lot must be clearly named on this Certificate of Conformance.</p>
Notification of change	The supplier shall notify DNA Genotek of any changes or substitutions prior to manufacturing this product so that DNA Genotek may evaluate the impact of that change in its application.
Note	None

For Reference Use Only
