

Product change notification

Product affected:  **OMNigene™GUT** and accessories collection kit

Catalog numbers/SKUs: OMR-200.100 and OM-200.100

Effective date of change: July 2022

Change description:

1. DNA Genotek is changing the SKU reference of the OMNigene•GUT and accessories collection kit configurations:
 - OMR-200.100 is changing to OMR-200+ACP101
 - OM-200.100 is changing to OM-200+ACP102
2. DNA Genotek is discontinuing the MO-3 biospecimen bag. Please consult Product Change Notification PCN-00083 as the MO-3 will no longer be available for the use in the current OMR-200.100 and OM-200.100 configuration. We will be transitioning to the use of the MO-5 biospecimen bag.

Discontinued bio-specimen bag	Alternate bio-specimen bag
<p>MO-3: Liquid-tight bio-specimen bag containing absorbent material to transport all DNA Genotek saliva and gut collection tubes.</p>  <p>The image shows a white, rectangular bio-specimen bag with a blue top edge. It features a red biohazard symbol and the text 'SPECIMEN BAG' and 'LIQUID-TIGHT'. Below the text are instructions: '1) Insert Specimens in Bag.', '2) Peel off Blue Release Cover, then Seal Bag by Pressing Down on Glue Line.' At the bottom, it says 'DNA GENOTEK' and 'TEAR AT SCORE TO OPEN'.</p>	<p>MO-5: Liquid-tight bio-specimen bag containing absorbent material. Printed with instructions for use on the bag to increase compliance with safe sample returns.</p>  <p>The image shows a white, rectangular bio-specimen bag with a blue top edge. It features a red biohazard symbol and the text 'SPECIMEN BAG' and 'LIQUID-TIGHT'. Below the text are instructions: '1) Insert Specimens in Bag.', '2) Peel off Blue Release Cover, then Seal Bag by Pressing Down on Glue Line.' At the bottom, it says 'DNA GENOTEK' and 'TEAR AT SCORE TO OPEN'.</p>

We appreciate your support during this transition.
